

# EurIdentity Certificate

## The Certificate (24 ECTS)

The EurIdentity Certificate provides a broad knowledge of Europe and European contexts. Through individual course visits in the Greater Region, students can also deepen their intercultural skills and expand their multilingualism. In this way, the EurIdentity Certificate also offers students the opportunity to prove the skills they have acquired for the international job market with a certificate.

## Structure

There are two levels :

- **Level 1 : EurIdentity Basic Module: Foundations of Europe** : E-learning module with basics on European topics (6 ECTS). Course language is English, course offer: winter semester.

- Level 2 : **EurIdentity Certificate: Advanced Level (18 ECTS)** : students get a deeper insight into European topics. Course languages are German, English or French, depending on the chosen classes. A student mobility is mandatory.

## Benefits:

European knowledge

Qualification for the job market

Intercultural competencies

Multilingualism

Studying in the Greater Region
